Index	55
--------------	-----------

Chapter 1

Namespace Index

1.1 Package List

Here are the packages with brief descriptions (if available):

com.example.app	9
----------------------------------	---

Chapter 2

Hierarchical Index

2.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

com.example.app.AddExpense	11
com.example.app.AddMenuItem	11
com.example.app.AddRate	12
com.example.app.Category	13
com.example.app.DatabaseConnection	15
com.example.app.DollarRate	20
com.example.app.EditMenuItem	22
com.example.app.Expenses	25
com.example.app.Fonction	27
com.example.app.HomeScreen	29
com.example.app.LoginController	30
com.example.app.MenuItem	31
com.example.app.newOrder	35
com.example.app.PowerOff	36
com.example.app.Refreshlist	36
com.example.app.Expense	23
com.example.app.RefreshMenulist	37
com.example.app.MenuItemPanel	34
com.example.app.RefreshSettings	37
com.example.app.Settings	41
com.example.app.RemoveExpense	38
com.example.app.RemoveRate	39
com.example.app.ReportsPanel	40
com.example.app.User	44
com.example.app.viewOrder	46
Application	
com.example.app.LoginScreen	30

Chapter 3

Class Index

3.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

<code>com.example.app.AddExpense</code>	11
<code>com.example.app.AddMenuItem</code>	11
<code>com.example.app.AddRate</code>	12
<code>com.example.app.Category</code>	13
<code>com.example.app.DatabaseConnection</code>	15
<code>com.example.app.DollarRate</code>	20
<code>com.example.app.EditMenuItem</code>	22
<code>com.example.app.Expense</code>	23
<code>com.example.app.Expenses</code>	25
<code>com.example.app.Fonction</code>	27
<code>com.example.app.HomeScreen</code>	29
<code>com.example.app.LoginController</code>	30
<code>com.example.app.LoginScreen</code>	30
<code>com.example.app.MenuItem</code>	31
<code>com.example.app.MenuItemPanel</code>	34
<code>com.example.app.newOrder</code>	35
<code>com.example.app.PowerOff</code>	36
<code>com.example.app.Refreshlist</code>	36
<code>com.example.app.RefreshMenulist</code>	37
<code>com.example.app.RefreshSettings</code>	37
<code>com.example.app.RemoveExpense</code>	38
<code>com.example.app.RemoveRate</code>	39
<code>com.example.app.ReportsPanel</code>	40
<code>com.example.app.Settings</code>	41
<code>com.example.app.User</code>	44
<code>com.example.app.viewOrder</code>	46

Chapter 4

File Index

4.1 File List

Here is a list of all files with brief descriptions:

C:/Users/johnn/Documents/Universal Script/Teams/TSF/POS/TSFApp/App/src/main/java/com/example/app/ AddExpense.java	47
C:/Users/johnn/Documents/Universal Script/Teams/TSF/POS/TSFApp/App/src/main/java/com/example/app/ AddMenuItem.java	47

- **Menuitem** (String name, String description, **Category** category, double price, ArrayList< String > ingredients)
- void **setDescription** (String description)
- void **setPrice** (double price)
- void **editIngredients** (ArrayList< String > ingredients)
- String **getName** ()
- String **getDescription** ()
- **Category** **getCategory** ()
- double **getPrice** ()
- ArrayList< String > **getIngredients** ()
- void **setCategory** (String category)

Static Public Member Functions

- static **Menuitem**[] **getAllMenuitems** ()
- static void **removeMenuitem** (**Menuitem** item)
- static ArrayList< **Menuitem** > **getMenuitems** ()
- static **Menuitem** **getMenuitem** (String name)
- static Boolean **MenuitemExists** (String name, **Category** category)

6.14.1 Constructor & Destructor Documentation

6.14.1.1 MenuItem()

```
com.example.app.MenuItem.MenuItem (
    String name,
    String description,
    Category category,
    double price,
    ArrayList< String > ingredients )
```

Here is the call graph for this function:

6.14.2 Member Function Documentation

6.14.2.1 editIngredients()

```
void com.example.app.MenuItem.editIngredients (
    ArrayList< String > ingredients )
```

6.14.2.2 getAllMenuItems()

```
static MenuItem[] com.example.app.MenuItem.getAllMenuItems ( ) [static]
```

6.14.2.3 getCategory()

```
Category com.example.app.MenuItem.getCategory ( )
```

6.14.2.4 getDescription()

```
String com.example.app.MenuItem.getDescription ( )
```

6.14.2.5 getIngredients()

```
ArrayList< String > com.example.app.MenuItem.getIngredients ( )
```

6.14.2.6 getMenuitem()

```
static MenuItem com.example.app.MenuItem.getMenuItem (
    String name ) [static]
```

Here is the caller graph for this function:

6.14.2.7 getMenuItems()

```
static ArrayList< MenuItem > com.example.app.MenuItem.getMenuItems ( ) [static]
```

Here is the caller graph for this function:

6.14.2.8 getName()

```
String com.example.app.MenuItem.getName ( )
```

6.14.2.9 getPrice()

```
double com.example.app.MenuItem.getPrice ( )
```

6.14.2.10 MenuItemExists()

```
static Boolean com.example.app.MenuItem.MenuItemExists (
    String name,
    Category category ) [static]
```

Here is the caller graph for this function:

6.14.2.11 removeMenuItem()

```
static void com.example.app.MenuItem.removeMenuItem (
    MenuItem item ) [static]
```

Here is the caller graph for this function:

6.14.2.12 setCategory()

```
void com.example.app.MenuItem.setCategory (
    String category )
```

Here is the call graph for this function:

6.14.2.13 setDescription()

```
void com.example.app.MenuItem.setDescription (
    String description )
```

Here is the caller graph for this function:

6.14.2.14 setPrice()

```
void com.example.app.MenuItem.setPrice (
    double price )
```

Here is the caller graph for this function:

6.15 com.example.app.MenuItemPanel Class Reference

Inheritance diagram for com.example.app.MenuItemPanel:

Collaboration diagram for com.example.app.MenuItemPanel:

Public Member Functions

- void **initialize** ()
- void **refreshMenuList** ()
- void **setBtnrefresh** ()
- void **setBtnback** ()
- void **setBtnadd** ()
- void **setBtnedit** ()

6.15.1 Member Function Documentation

6.15.1.1 initialize()

```
void com.example.app.MenuItemPanel.initialize ( )
```

Here is the call graph for this function:

6.15.1.2 refreshMenuList()

```
void com.example.app.MenuItemPanel.refreshMenuList ( )
```

Implements **com.example.app.RefreshMenuList** (p. 37).

Here is the call graph for this function: Here is the caller graph for this function:

6.15.1.3 setBtnadd()

```
void com.example.app.MenuItemPanel.setBtnadd ( )
```

Here is the call graph for this function:

6.15.1.4 setBtnback()

```
void com.example.app.MenuItemPanel.setBtnback ( )
```

6.15.1.5 setBtnedit()

```
void com.example.app.MenuItemPanel.setBtnedit ( )
```

Here is the call graph for this function:

6.15.1.6 setBtnrefresh()

```
void com.example.app.MenuItemPanel.setBtnrefresh ( )
```

Here is the call graph for this function:

The documentation for this class was generated from the following file:

6.16 com.example.app.newOrder Class Reference

Protected Member Functions

- void **initialize** ()
- void **btnBackOnAction** ()

6.16.1 Member Function Documentation

6.16.1.1 btnBackOnAction()

```
void com.example.app.newOrder.btnBackOnAction ( ) [protected]
```

6.16.1.2 initialize()

```
void com.example.app.newOrder.initialize ( ) [protected]
```

The documentation for this class was generated from the following file:

- C:/Users/johnn/Documents/Universal Script/Teams/TSF/POS/TSFApp/App/src/main/java/com/example/app/**newOrder.java**

6.17 com.example.app.PowerOff Class Reference

Collaboration diagram for com.example.app.PowerOff:

Protected Member Functions

- void **btnLogoutAction** ()
- void **btnCancelAction** ()
- void **btnExitAction** ()

6.17.1 Member Function Documentation

6.17.1.1 btnCancelAction()

```
void com.example.app.PowerOff.btnCancelAction ( ) [protected]
```

6.17.1.2 btnExitAction()

```
void com.example.app.PowerOff.btnExitAction ( ) [protected]
```

6.17.1.3 btnLogoutAction()

```
void com.example.app.PowerOff.btnLogoutAction ( ) [protected]
```

The documentation for this class was generated from the following file:

6.18 com.example.app.Refreshlist Interface Reference

Inheritance diagram for com.example.app.Refreshlist:

Public Member Functions

- void **refreshExpenses** ()

6.18.1 Member Function Documentation

6.18.1.1 refreshExpenses()

```
void com.example.app.Refreshlist.refreshExpenses ( )
```

Implemented in **com.example.app.Expense** (p. 24).

Here is the caller graph for this function:

The documentation for this interface was generated from the following file:

- C:/Users/johnn/Documents/Universal Script/Teams/TSF/POS/TSFApp/App/src/main/java/com/example/app/**Refreshlist.java**

6.19 com.example.app.RefreshMenulist Interface Reference

Inheritance diagram for com.example.app.RefreshMenulist:

Public Member Functions

- void **refreshMenuList** ()

6.19.1 Member Function Documentation

6.19.1.1 refreshMenuList()

```
void com.example.app.RefreshMenulist.refreshMenuList ( )
```

Implemented in **com.example.app.MenuItemPanel** (p. 34).

Here is the caller graph for this function:

The documentation for this interface was generated from the following file:

- C:/Users/johnn/Documents/Universal Script/Teams/TSF/POS/TSFApp/App/src/main/java/com/example/app/**RefreshMenulist.java**

6.20 com.example.app.RefreshSettings Interface Reference

Inheritance diagram for com.example.app.RefreshSettings:

Public Member Functions

- void **refreshSettings** ()

6.20.1 Member Function Documentation

6.20.1.1 refreshSettings()

```
void com.example.app.RefreshSettings.refreshSettings ( )
```

Implemented in **com.example.app.Settings** (p. 43).

Here is the caller graph for this function:

The documentation for this interface was generated from the following file:

- C:/Users/johnn/Documents/Universal Script/Teams/TSF/POS/TSFApp/App/src/main/java/com/example/app/**RefreshSettings.java**

6.21 com.example.app.RemoveExpense Class Reference

Collaboration diagram for com.example.app.RemoveExpense:

Public Member Functions

- **RemoveExpense** ()
- void **setExpenseRefresher** (**Refreshlist** expenseRefresher)

Protected Member Functions

- void **initialize** ()
- void **btnRemoveExpenseActionPerformed** ()
- void **btnCancelRemoveExpense** ()

6.21.1 Constructor & Destructor Documentation

6.21.1.1 RemoveExpense()

```
com.example.app.RemoveExpense.RemoveExpense ( )
```

6.21.2 Member Function Documentation

6.21.2.1 btnCancelRemoveExpense()

```
void com.example.app.RemoveExpense.btnCancelRemoveExpense ( ) [protected]
```

6.21.2.2 btnRemoveExpenseActionPerformed()

```
void com.example.app.RemoveExpense.btnRemoveExpenseActionPerformed ( ) [protected]
```

Here is the call graph for this function:

6.21.2.3 initialize()

```
void com.example.app.RemoveExpense.initialize ( ) [protected]
```

Here is the call graph for this function:

6.21.2.4 setExpenseRefresher()

```
void com.example.app.RemoveExpense.setExpenseRefresher (
    Refreshlist expenseRefresher )
```

Here is the caller graph for this function:

The documentation for this class was generated from the following file:

6.23 com.example.app.ReportsPanel Class Reference

Collaboration diagram for com.example.app.ReportsPanel:

Protected Member Functions

- void **btnBackOnAction** ()

6.23.1 Member Function Documentation

6.23.1.1 btnBackOnAction()

```
void com.example.app.ReportsPanel.btnBackOnAction ( ) [protected]
```

The documentation for this class was generated from the following file:

- C:/Users/johnn/Documents/Universal Script/Teams/TSF/POS/TSFApp/App/src/main/java/com/example/app/**ReportsPanel.java**

6.24 com.example.app.Settings Class Reference

Inheritance diagram for com.example.app.Settings:

Collaboration diagram for com.example.app.Settings:

Public Member Functions

- void **initialize** ()
- void **refreshSettings** ()

Protected Member Functions

- void **btnBackOnAction** ()
- void **btnAddFonction** ()
- void **btnDeleteFonction** ()
- void **btnaddUseronAction** ()
- void **btnDeleteUseronAction** ()
- void **btnChangefonction** ()
- void **btnChangePasswordonAction** ()
- void **onUserfccbChanged** ()
- void **btnChangeRateOnAction** ()
- void **setRatePromptText** ()
- void **ViewRateLabel** ()
- void **AddRateonAction** ()
- void **btnRemoveRateonAction** ()

6.24.1 Detailed Description

The Settings class is responsible for managing the settings view of the application. It provides functionalities to manage functions, users, user roles, and to update passwords.

6.24.2 Member Function Documentation

6.24.2.1 AddRateonAction()

```
void com.example.app.Settings.AddRateonAction ( ) [protected]
```

Here is the call graph for this function:

6.24.2.2 btnAddFonction()

```
void com.example.app.Settings.btnAddFonction ( ) [protected]
```

Handles the action when "Add Fonction" button is pressed. It adds a new function to the system if it does not already exist. Here is the call graph for this function:

6.24.2.3 btnaddUseronAction()

```
void com.example.app.Settings.btnaddUseronAction ( ) [protected]
```

Handles the action when "Add User" button is pressed. It adds a new user to the system if it does not already exist. Here is the call graph for this function:

6.24.2.4 btnBackOnAction()

```
void com.example.app.Settings.btnBackOnAction ( ) [protected]
```

Handles the action when "Back" button is pressed. It navigates back to the "Home Screen" view.

6.24.2.5 btnChangefonction()

```
void com.example.app.Settings.btnChangefonction ( ) [protected]
```

Handles the action when "Change Fonction" button is pressed. It updates the user's function in the system. Here is the call graph for this function:

6.24.2.6 btnChangePasswordonAction()

```
void com.example.app.Settings.btnChangePasswordonAction ( ) [protected]
```

Handles the action when "Change Password" button is pressed. It updates the user's password in the system after validation. Here is the call graph for this function:

6.24.2.7 btnChangeRateOnAction()

```
void com.example.app.Settings.btnChangeRateOnAction ( ) [protected]
```

Handles the action when "Save Rate" button is pressed. It updates the exchange rate in the system. Here is the call graph for this function:

6.24.2.8 btnDeleteFonction()

```
void com.example.app.Settings.btnDeleteFonction ( ) [protected]
```

Handles the action when "Delete Fonction" button is pressed. It deletes a function from the system if it exists. Here is the call graph for this function:

6.24.2.9 btnDeleteUseronAction()

```
void com.example.app.Settings.btnDeleteUseronAction ( ) [protected]
```

Handles the action when "Delete User" button is pressed. It deletes a user from the system if it exists. Here is the call graph for this function:

6.24.2.10 btnRemoveRateonAction()

```
void com.example.app.Settings.btnRemoveRateonAction ( ) [protected]
```

Here is the call graph for this function:

6.24.2.11 initialize()

```
void com.example.app.Settings.initialize ( )
```

Initializes the comboboxes with data. Here is the call graph for this function: Here is the caller graph for this function:

6.24.2.12 onUserfccbChanged()

```
void com.example.app.Settings.onUserfccbChanged ( ) [protected]
```

Handles the change of user in the "User for change fonction" combobox. It updates the displayed function to match the selected user's current function. Here is the call graph for this function:

6.24.2.13 refreshSettings()

```
void com.example.app.Settings.refreshSettings ( )
```

Implements **com.example.app.RefreshSettings** (p.38).

Here is the call graph for this function:

6.24.2.14 setRatePromptText()

```
void com.example.app.Settings.setRatePromptText ( ) [protected]
```

Here is the call graph for this function:

6.24.2.15 ViewRateLabel()

```
void com.example.app.Settings.ViewRateLabel ( ) [protected]
```

Here is the call graph for this function:

The documentation for this class was generated from the following file:

- C:/Users/johnn/Documents/Universal Script/Teams/TSF/POS/TSFApp/App/src/main/java/com/example/app/**Settings.java**

6.25 com.example.app.User Class Reference

Public Member Functions

- **User** ()
- **User** (String username, String password, String fonction)
- String **getUsername** ()
- String **getPassword** ()
- String **getFonction** ()

Static Public Member Functions

- static ArrayList< **User** > **getUserlist** ()
- static ArrayList< String > **getUsernameList** ()
- static Boolean **isAvailable** (String username)
- static String **getPasswordbyuser** (String username)
- static String **getFonctionbyuser** (String username)
- static void **ChangePassword** (String username, String password)
- static void **ChangeFonction** (String username, String fonction)
- static void **DeleteByFonction** (String fonction)
- static void **deleteUser** (String username)
- static void **printUserList** ()

6.25.1 Constructor & Destructor Documentation

6.25.1.1 User() [1/2]

```
com.example.app.User.User ( )
```

6.25.1.2 User() [2/2]

```
com.example.app.User.User (
    String username,
    String password,
    String fonction )
```

6.25.2 Member Function Documentation

6.25.2.1 ChangeFonction()

```
static void com.example.app.User.ChangeFonction (
    String username,
    String fonction ) [static]
```

Here is the call graph for this function: Here is the caller graph for this function:

6.25.2.2 ChangePassword()

```
static void com.example.app.User.ChangePassword (
    String username,
    String password ) [static]
```

Here is the call graph for this function: Here is the caller graph for this function:

6.25.2.3 DeleteByFonction()

```
static void com.example.app.User.DeleteByFonction (
    String fonction ) [static]
```

Here is the call graph for this function: Here is the caller graph for this function:

6.25.2.4 deleteUser()

```
static void com.example.app.User.deleteUser (
    String username ) [static]
```

Here is the call graph for this function: Here is the caller graph for this function:

6.25.2.5 getFonction()

```
String com.example.app.User.getFonction ( )
```

6.25.2.6 getFonctionbyuser()

```
static String com.example.app.User.getFonctionbyuser (
    String username ) [static]
```

Here is the caller graph for this function:

6.25.2.7 getPassword()

```
String com.example.app.User.getPassword ( )
```

6.25.2.8 getPasswordbyuser()

```
static String com.example.app.User.getPasswordbyuser (
    String username ) [static]
```

Here is the caller graph for this function:

6.25.2.9 getUserlist()

```
static ArrayList< User > com.example.app.User.getUserlist ( ) [static]
```

Here is the caller graph for this function:

6.25.2.10 getUsername()

```
String com.example.app.User.getUsername ( )
```

6.25.2.11 getUsernamelist()

```
static ArrayList< String > com.example.app.User.getUsernamelist ( ) [static]
```

Here is the caller graph for this function:

6.25.2.12 isAvailable()

```
static Boolean com.example.app.User.isAvailable (
    String username ) [static]
```

Here is the caller graph for this function:

6.25.2.13 printUserList()

```
static void com.example.app.User.printUserList ( ) [static]
```

Here is the caller graph for this function:
